

31.1142.11 BODYTEMP 478 Fever Infrared Thermometer

With the non-contact **BODYTEMP 478** thermometer, you can **quickly and easily measure a person's body temperature** or the surface temperature of different materials.

In body mode, the infrared thermometer is ideal for measuring fever, even of a large group of people.

The operation is very simple - just press the measurement button and read the measured value, done. Regardless of whether you want to measure body or surface temperature, the **BODYTEMP 478** determines the measured value in **less than 0.5 seconds**.

Perfect for fast measurement of body temperature of a large group of people.

Regular temperature measurements and random inspections can be very important for early detection of the new Coronavirus illness (COVID-19) and to protect against further infection. The thermometer is pointed at the person's forehead from 5 to 15 cm distance and then the measurement button is pressed - fast and hygienically safe, as the measurement of temperature is completely contact-free

- **For measuring body or surface temperature**
- **Ideal for fast fever measurement, even for a large group of people**
- **Threshold alarm with acoustic signal**
- **Simultaneous display of measured value and stored value**
- **Memory for 32 measured values**
- **Coated optics with a measuring spot ratio of 8:1**
- **Backlight**

Technical data:

- Backlight
- Measuring range body temperature: 32 ... 42,5°C
- Measuring range surface temperature: 0 ... 60°C
- Accuracy: $\pm 0,3^{\circ}\text{C}$ (in the range of 30...40°C)
- Display resolution: 0,1°
- Dimensions: 46 x 83 x 149 mm
- Weight: 156 g
- Incl. batteries (2 x 1,5V AA)
