

Easy installation

Installs in only 3 steps – it's that easy, done within a few minutes.

1. Download the free WeatherHub app from the "Apple App-Store" or from the "Google Play Store" on your smartphone.
2. Activate the WeatherHub gateway unit with the included power supply and connect the gateway to your internet router with the network cable provided.
3. Place the batteries into the wireless transmitter, open the app and select "Add new sensor". Scan the QR code on the back to add the sensor.

DONE !

Sensor settings

You can name each sensor individually.

In addition you can set alarm limits and retrieve history data.

Additional sensors

Kat.Nr. 30.3301.02

Temperature transmitter with waterproof cable sensor

Measuring range: -30 ... +60°C
-22 ... +140°F

Kat.Nr. 30.3303.02

Temperature/humidity transmitter

Measuring range: -40 ... +60°C
-40 ... +140°F
1 ... 99% rH

Kat.Nr. 30.3304.02

Temperature/humidity transmitter with waterproof cable sensor

Measuring range: -40 ... +60°C
-40 ... +140°F
1 ... 99% rH

Kat.Nr. 30.3305.02

Temperature/humidity transmitter with water detector

Measuring range: -40 ... +60°C
-40 ... +140°F
1 ... 99% rH

Extendable to up to 50 wireless transmitters !

The system can be extended to up to 50 sensors. More transmitters and connectable devices are already in development, e.g.: plant sensor, rain gauge, anemometer, weather stations, ...
